

E6 — bilingual artifacts (partial)

Inputs. EN/ES md, tex, pdf with hashes verified (E0; re-verified inside `e6_auto.py`: `sha256_ok` true for both PDFs). PDFs were only read; nothing regenerated.

Method (auditor-written `e6_auto.py`; output `e6_auto.json`, `pdftext_{en,es}.txt`, 101 page rasters in `pages/`).

Check	EN	ES	Result
Page count (expected 50 / 51)	50	51	PASS
Fonts	all subset-embedded (prefix XXXXXX+)	same	PASS. CORRECTION (auditor): the script's <code>non_embedded_fonts</code> list is a false positive — it keyed on the extension field; every listed font carries a subset prefix, i.e. is embedded.
U+FFFD replacement glyphs in extracted text	0	0	PASS
? ? / unresolved-reference markers	0	0	PASS ("Missing" hits are the identifier <code>ChordalCoreMissing</code>)
Near-blank pages	none	none	PASS
Display-math blocks EN vs ES (md, whitespace/ <code>\text</code> normalised)	158	158	identical, 0 differences
Headings	67	67	PASS
Distinctive constants (16, 48, 117/1825, 12687/20000, 19/365, 253/500, 2920, 219, 1600, 87947/44352, 393, 65536, 16384, 57344, 4500, 2208, 105, 59516, 191432, 59517, 10^{-16} , 10^{-12}) md vs tex, EN vs ES	—	—	consistent across the four sources (only "16" differs md 35 vs tex 39 in both languages equally: TeX macros)
Numeric-token multiset EN vs ES md	—	—	differences only from a stray <code>\Needspace{20\baselineskip}</code> at EN md l.1745 (absent in ES md) and wording ("zero"); no semantic divergence
Status language	l.11 / PDF p.1, §7	same	Current: external review "pending"; no stale v1.0.2/1.0.3 labels; <code>PASS_INTERNAL_AUTHOR_SIDE</code> appears only as the author-side record (§7). PASS
Attribution of [15]	§1 l.46, §8.1	§1 l.46, §8.1 l.1029	Same omission of [15, Thm 1.1] in both languages (E7-F1)

Visual inspection. Only a sample was inspected by eye (EN p. 27, and [15] pages for E7). Observed: code identifiers are set in roman and broken across lines without any marker (e.g. `PASS_INTERNAL_AUTHOR_SIDE`, `gain_t` | ..., `NearH1CalibratedRotation` in ES) — MINOR typographic issue (copy-paste of identifiers breaks). **Full page-by-page visual inspection of all 101 pages was not performed:** after the E7 blocker, new expensive work was stopped (request §4.2). Rasters are retained for a later pass.

Other observations. `PAPER_IV_preprint_v1.0.1_{en,es}.aux` are present in the candidate directory but not listed in `MANIFEST.json` (E0) — OBSERVATION.

E6 = INCONCLUSIVE (automated checks pass; full visual QA not done; attribution defect shared by both editions).

Rendered from the Markdown semantic source with PyMuPDF; not compiled from the TeX file (no TeX engine installed).
