### E7 — Literature and attribution (regression)

- The reference list is unchanged in number and order: 23 entries in EN and in ES. Only two reference lines differ in the diff:
  - [5] now spells "Preference Labs" (EN "Jacobian at Preference Labs", ES "Jacobian de Preference Labs"). This closes the X-10 spelling observation.
  - ES [6] has its original title restored: «Integer and fractional packings in dense graphs». **NEW-02 RESOLVED.**
- No new literature is cited. C.3 relies on the pinned Mathlib dependency [11], which is already cited, and names its definitions; I checked them literally in the pinned source (E2/E3).
- Cited titles are not translated; I verified [6], [7] and [9] on EN p71 and ES p72.
- X-06 to X-11: the text is unchanged from v1.21 (diff), so these stay RESOLVED and the run\_v1.21\_r1 literature checks are inherited.
- No external source was consulted or fetched in this cycle. None was needed, because no citation was added.

**E7 verdict: PASS.**
