

Gate E8 report — run_v1.22_r1 (Paper IV v1.22-r1)

Verdict: **PASS_WITH_OBSERVATIONS**. Evidence: 20_EVIDENCE/E8/. Auditor: Claude Opus 5.5, same session as run_v1.2_r1/run_v1.21_r1; no Lean executed.

E8 — Author evidence, scope attribution and packaging

Item	Examination	Result
E8-01: 1266-log scan	The E8-01 row of <code>RESPONSE_TO_REVALIDATION_v1.22.md</code> says the author's earlier scan covered 844 logs and the auditor extended it to 1266, with zero alerts, and that this evidence is reused with attribution. This matches the <code>run_v1.21_r1</code> E8 record. I re-executed the <code>run_v1.21_r1</code> detector script read-only (<code>e8_detector_check.py</code> → <code>E8_DETECTOR_RERUN.json</code>): 10/10 cases correct; $608 + 50 + 422 + 186 = 1266$ logs, 0 detector hits, 0 broad "sorry" hits. The result is identical to the v1.21 JSON.	Correctly attributed. The 1266 scope is the prior auditor's scan, not the old author script.
E8-02 / X-28: runner patch	The frozen runners <code>tools/paperiv_build.py</code> and <code>tools/audit_publication.py</code> still have their <code>SOURCE_MANIFEST</code> hashes. There is no <code>patch</code> file in the v1.22 candidate directory, and the response says the patch is not applied.	Not applied. X-28 stays MITIGATED by the external detector, and the limitation stays declared.
E8-03: single package	E0: <code>PAPER_IV_v1.22_REVIEW_PACKAGE_r1.zip</code> , bound by <code>AUDIT_TARGET</code> and its sidecar, is the only ZIP in <code>v1.22_editorial_candidate/</code> .	RESOLVED
Response claims: X-15 and NEW-01	X-15 says the prose was translated, but 13 residual occurrences remain. NEW-01 says <code>Model</code> was restored, but only the EN text was fixed (E6).	Inaccurate claims (MINOR)
Response claims: C.3 Lean correspondence	The listed declarations exist and match the prose (E2/E3).	Correct
Response claims: R-01 kept, R-02 clarified	Confirmed (E2).	Correct
Other author objects (<code>PROTECTED_BASELINE.json</code> , <code>SEMANTIC_CHECKS.json</code> , <code>EXACT_CHECKS.json</code> , <code>LEAN_IDENTITY_CHECK.json</code> , <code>VISUAL_REVIEW_v1.22.md</code>)	All are bound by the manifest (E0). They were used only as claims to contrast, never as an inherited PASS. <code>VISUAL_REVIEW</code> claims "valor base" and the restored [6], which is correct; it does not claim the prose translation.	Noted
Historical items	X-19, X-22, X-24, X-26, X-29, AUD-P1, AUD-C1, AUD-C2 and the C-* / C1-* corrections are preserved in their runs, which are unchanged (E0).	Preserved

E8 verdict: PASS_WITH_OBSERVATIONS.
