

Informe de puerta E5 — run_v1.22_r3 (Paper IV v1.22-r3)

Veredicto actual: **PASS**. Evidencia: 20_EVIDENCE/E5/. Auditor: Claude Opus 5.5, misma sesión que las ejecuciones anteriores; no se ejecutó Lean.

E5 — Exact arithmetic and falsification (r3)

No formula changed in r3, so no script was re-run (mandate §5). The E5 evidence is **inherited and revalidated by identity**: the arithmetic scripts and outputs of run_v1.22_r2 and run_v1.22_r1 are intact (E0: their manifests are unchanged).

Inventory, with no double counting:

- 59 distinct checks: T01–T24 (run_v1.2_r1), 21 (v1.21), 14 (C3a–C3n, r1).
- 7 added negative controls: the corrected C3m control plus 6 supplementary controls.
- Every negative control was rejected.
- The repetitions in r2 gave identical results and **are not counted as new checks**.

The new log-reader controls (15 unit cases and 4 CLI corruptions) belong to E8. They do not prove theorems.

Finite-range checks and the Certo certificate (a feasible 6-part exact clique partition of $K3\vee I3$) do not replace universal proofs. The universal statements rest on E2 and on the formal theorems (E4).

E5 verdict (r3): PASS. Inherited and revalidated by identity.
